**1 User interface directions for the Web**

Jakob Nielsen

January 1999 **Communications of the ACM**, Volume 42 Issue 1**Publisher:** ACM PressFull text available:  [pdf\(421.52 KB\)](#)  [html\(35.34 KB\)](#)Additional Information: [full citation](#), [references](#), [citations](#), [index terms](#), [review](#)**2 Research sessions: Research 12: Linking & search: Efficient and decentralized PageRank approximation in a peer-to-peer web search network**

Josiane Xavier Parreira, Debora Donato, Sebastian Michel, Gerhard Weikum

September 2006 **Proceedings of the 32nd international conference on Very large data base: Volume 32 VLDB'2006****Publisher:** VLDB EndowmentFull text available:  [pdf\(945.45 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

PageRank-style (PR) link analyses are a cornerstone of Web search engines and Web mining, but are computationally expensive. Recently, various techniques have been proposed for speeding up these analyses by distributing the link graph among multiple sites. However, none of these advanced methods is suitable for a fully decentralized PR computation in a peer-to-peer (P2P) network with autonomous peers, where each peer can independently crawl Web fragments according to the user's thematic interests ...

**3 Educational aspects of digital libraries: How geography professors select materials for class lectures: implications for the design of digital libraries**

Christine L. Borgman, Gregory H. Leazer, Anne Gilliland-Swetland, Kelli Millwood, Leslie Champeny Finley, Laura J. Smart

June 2004 **Proceedings of the 4th ACM/IEEE-CS joint conference on Digital libraries JCDL****Publisher:** ACM PressFull text available:  [pdf\(231.32 KB\)](#) Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

A goal of the Alexandria Digital Earth Prototype (ADEPT) project is to make primary resources in geography useful for undergraduate instruction in ways that will promote inquiry learning. The education and evaluation team interviewed professors about their use of geographic information they prepare for class lectures, as compared to their research activities. We found that professors

desired the ability to search by concept (erosion, continental drift, etc ) as well as geographic location ...

**Keywords:** digital libraries, digital library design, educational aspects of digital libraries, geographic information seeking behavior, user analysis

4 Interacting with mobile services: an evaluation of camera-phones and visual tags

Eleanor Toye, Richard Sharp, Anil Madhavapeddy, David Scott, Eben Upton, Alan Blackwell  
January 2007 **Personal and Ubiquitous Computing**, Volume 11 Issue 2

**Publisher:** Springer-Verlag

Full text available: .pdf(362.99 KB)

Additional Information: [full citation](#), [abstract](#)

We present a study of using camera-phones and visual-tags to access mobile services. Firstly, a *experience study* is described in which participants were both observed learning to interact with prototype mobile service and interviewed about their experiences. Secondly, a *pointing-device* is presented in which quantitative data was gathered regarding the speed and accuracy with which participants aimed and clicked on visual-tags using camera-phones. We found that participants ...

5 Manipulating space: Collapse-to-zoom: viewing web pages on small screen devices by

 interactively removing irrelevant content

Patrick Baudisch, Xing Xie, Chong Wang, Wei-Ying Ma

October 2004 **Proceedings of the 17th annual ACM symposium on User interface software & technology UIST '04**

**Publisher:** ACM Press

Full text available: .pdf(702.63 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

Overview visualizations for small-screen web browsers were designed to provide users with visual context and to allow them to rapidly zoom in on tiles of relevant content. Given that content in overview is reduced, however, users are often unable to tell which tiles hold the relevant material which can force them to adopt a time-consuming hunt-and-peck strategy. Collapse-to-zoom addresses this issue by offering an alternative exploration strategy. In addition to allowing users to zoom in

**Keywords:** PDA, collapse-to-zoom, gesture, marquee menu, overview, pen, small screen device browsing

6 Adapting multimedia for diverse student learning styles

Glenn D. Blank, Soma Roy, Shreeram Sahasrabudhe, William M. Pottenger, G. Drew Kessler  
February 2003 **Journal of Computing Sciences in Colleges**, Volume 18 Issue 3

**Publisher:** Consortium for Computing Sciences in Colleges

Full text available: .pdf(219.49 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Multimedia can accommodate diverse learning styles. By giving students different ways to learn material, we hope to attract more novices, especially women and minorities, to computer science. We designed a user interface that is independent of both book metaphors and familiar web browser supplies sound and animation for sensory learners, while letting verbal learners disable sound or switch altogether to a JUST THE FACTS mode. Interactive materials include learner-controlled simulations of ...

7 Navigation and interaction: ShowMotion: camera motion based 3D design review

 Nicolas Burtnyk, Azam Khan, George Fitzmaurice, Gordon Kurtenbach

March 2006 **Proceedings of the 2006 symposium on Interactive 3D graphics and games I3**

**Publisher:** ACM Press

Full text available: .pdf(404.38 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

We describe a new interactive system for 3D design review, built to exploit the visual perception of motion parallax, in order to enhance shape perception and aesthetic evaluation. Traditional C applications typically use "bookmarked" static views for design evaluation. In our system, we replace static views with moving "shots" interspersed with cinematic visual transitions. Furthermore, users access shots by picking object features on the 3D model, which invokes a spatial search over ...

**Keywords:** 3D navigation, 3D viewers, 3D visualization, camera controls, design review, interaction techniques

**8 Display: Improving revisitation in fisheye views with visit wear**

 Amy Skopik, Carl Gutwin

April 2005 **Proceedings of the SIGCHI conference on Human factors in computing systems '05**

**Publisher:** ACM Press

Full text available:  pdf(523.18 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

The distortion caused by an interactive fisheye lens can make it difficult for people to remember locations in the data space. In this paper we introduce the idea of visit wear - a visual representation of the places that the user has previously visited - as a way to improve navigation in spaces affected by distortion. We outline the design dimensions of visit wear, and report on two studies. The first shows that increasing the distortion of a fisheye view does significantly reduce

**Keywords:** edit wear, fisheye usability, fisheye views, focus+context techniques, memorability, spatial memory, visit wear

**9 Usability testing with screen reading technology in a Windows environment**

 Kitch Barnicle

November 2000 **Proceedings on the 2000 conference on Universal Usability CUU '00**

**Publisher:** ACM Press

Full text available:  pdf(912.14 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

Ever since applications with graphical user interfaces were introduced, individuals who are blind experienced great difficulty accessing these applications. The quality of access provided through combination of screen reading software and speech synthesizer is greatly dependent on the design of the mainstream application interface. In attempt to better understand the access strategies employed by users of screen readers, this study was designed to (a) examine the interaction between us...

**Keywords:** GUI, blindness, disability, screen reader

**10 Experiences using a collaborative electronic textbook: bringing the "guide on the side" home to you**

 Ryan McFall, Herbert Dershem, Darcy Davis

March 2006 **ACM SIGCSE Bulletin , Proceedings of the 37th SIGCSE technical symposium on Computer science education SIGCSE '06, Volume 38 Issue 1**

**Publisher:** ACM Press

Full text available:  pdf(83.25 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Much has been made of the transition of the instructor's role from "Sage on the Stage" to "Guide on the Side", focusing on active and collaborative learning in the classroom. The process of acquiring knowledge from textbooks has largely remained unaffected by this transition. Our work on electronic textbooks (e-textbooks) has focused on building e-textbooks that extend the reach of collaborative and active learning techniques to the reading process. This paper describes the outcomes of using our ...

**Keywords:** active reading, electronic textbooks

**11 Web Behavior Patterns: How knowledge workers use the web**

 Abigail J. Sellen, Rachel Murphy, Kate L. Shaw

April 2002 **Proceedings of the SIGCHI conference on Human factors in computing system  
Changing our world, changing ourselves CHI '02**

Publisher: ACM Press

Full text available:  pdf(425.34 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

We report on a diary study of how and why knowledge workers use the World Wide Web. By examining in detail a complete two-day set of Web activities from each of 24 people, we construct a framework with which to describe the different tasks knowledge workers undertake. By looking at the characteristics of each type of activity, we can see how certain activities are unsuited to particular kinds of technologies (e.g., mobile devices); how Web tools might be incrementally improved; and how we might ...

**Keywords:** World Wide Web, appliances, diary study, knowledge workers, mobile technology, taxonomy

**12 Personal information management: To have and to hold: exploring the personal archive**

 Joseph 'Jofish' Kaye, Janet Vertesi, Shari Avery, Allan Dafoe, Shay David, Lisa Onaga, Ivan Rosero, Trevor Pinch

April 2006 **Proceedings of the SIGCHI conference on Human Factors in computing system  
'06**

Publisher: ACM Press

Full text available:  pdf(761.50 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The personal archive is not only about efficient storage and retrieval of information. This paper describes a study of forty-eight academics and the techniques and tools they use to manage their digital and material archiving of papers, emails, documents, internet bookmarks, correspondence and other artifacts. We present two sets of results: we first discuss rationales behind subjects' archiving practices which go beyond information retrieval to include creating a legacy, sharing resources, confronting

**Keywords:** archiving, bookmarks, email, ethnography, filing, identity

**13 Visualization: Improving list revisititation with ListMaps**

 Carl Gutwin, Andy Cockburn

May 2006 **Proceedings of the working conference on Advanced visual interfaces AVI '06**

Publisher: ACM Press

Full text available:  pdf(348.58 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Selecting items from lists is a common task in many applications. Alphabetically-sorted listboxes are the most common interface widget used to accomplish this selection, but although generally simple and effective, they are slow and frustrating to use, particularly when the lists are long. In addition, when the user regularly revisits a small set of items, listboxes provide little support for increased performance through experience. To address these shortcomings, we developed a new list selection device called a ListMap.

**Keywords:** list selection, listboxes, listmaps, revisititation

**14 Accessing hyperdocuments through interactive dynamic maps**

Mountaz Zizi, Michel Beaudouin-Lafon

September 1994 **Proceedings of the 1994 ACM European conference on Hypermedia technolo**

**ECHT '94**

Publisher: ACM Press

Full text available: [pdf\(1.39 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

We propose a new navigation paradigm based on a spatial metaphor to help users access and n within large sets of documents. This metaphor is implemented by a computer artifact called an Interactive Dynamic Map (IDM). An IDM plays a role similar to the role of a real map with respe physical space. Two types of IDMs are computed from the documents: Topic IDMs represent the semantic contents of a set of documents while Document IDMs visualize a subset of documents

**Keywords:** information retrieval, interaction paradigm, maps, navigation, visualization

**15 Capturing, structuring, and representing ubiquitous audio**

Debby Hindus, Chris Schmandt, Chris Horner

October 1993 **ACM Transactions on Information Systems (TOIS)**, Volume 11 Issue 4

Publisher: ACM Press

Full text available: [pdf\(1.78 MB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

Although talking is an integral part of collaboration, there has been little computer support for acquiring and accessing the contents of conversations. Our approach has focused on ubiquitous or the unobtrusive capture of speech interactions in everyday work environments. Speech recogn technology cannot yet transcribe fluent conversational speech, so the words themselves are not available for organizing the captured interactions. Instead, the structure of an int ...

**16 Extending to multidimensional interfaces: 3Book: a 3D electronic smart book**

Stuart K. Card, Lichan Hong, Jock D. Mackinlay, Ed H. Chi

May 2004 **Proceedings of the working conference on Advanced visual interfaces AVI '04**

Publisher: ACM Press

Full text available: [pdf\(383.44 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index term](#)

This paper describes the 3Book, a 3D interactive visualization of a codex book as a component in various digital library and sensemaking systems. The book is designed to hold large books and to support sensemaking operations by readers. The book includes methods in which the automatic semantic analysis of the book's content is used to dynamically tailor access.

**Keywords:** 3D UI, 3D books, eBooks, electronic publishing, sensemaking, spreading activation

**17 The Compressor: concurrent, incremental, and parallel compaction**

Haim Kermany, Erez Petrank

June 2006 **ACM SIGPLAN Notices , Proceedings of the 2006 ACM SIGPLAN conference on Programming language design and implementation PLDI '06**, Volume 41 Issue 6

Publisher: ACM Press

Full text available: [pdf\(483.26 KB\)](#)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

The widely used Mark-and-Sweep garbage collector has a drawback in that it does not move objects during collection. As a result, large long-running realistic applications, such as Web application servers, frequently face the fragmentation problem. To eliminate fragmentation, a heap compactor runs periodically. However, compaction typically imposes very long undesirable pauses in the application. While efficient concurrent collectors are ubiquitous in production runtime systems (: JVMs), ...

**Keywords:** compaction, concurrent garbage collection, garbage collection, memory management, runtime systems

**18 Photo sharing: Give and take: a study of consumer photo-sharing culture and practice**

 Andrew D. Miller, W. Keith Edwards

April 2007 **Proceedings of the SIGCHI conference on Human factors in computing system '07**

**Publisher:** ACM Press

Full text available:  pdf(669.52 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

In this paper, we present initial findings from the study of a digital photo-sharing website: Flickr. In particular, we argue that Flickr.com appears to support-for some people-a different set of photography practices, socialization styles, and perspectives on privacy that are unlike those described in previous research on consumer and amateur photographers. Further, through our examination of digital photographers' photowork activities-organizing, finding, sharing and receiving-we suggest

**Keywords:** consumer photography, digital photography, domestic and leisure computing, media sharing, photowork

**19 Disabilities: Remote usability evaluations With disabled people**

 Helen Petrie, Fraser Hamilton, Neil King, Pete Pavan

April 2006 **Proceedings of the SIGCHI conference on Human Factors in computing system '06**

**Publisher:** ACM Press

Full text available:  pdf(461.18 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [index terms](#)

Finding participants for evaluations with specific demographics can be a problem for usability and experience specialists. In particular, finding participants with disabilities is especially problematic. Testing with disabled people is becoming increasingly important. Two case studies are presented to explore using asynchronous remote evaluation techniques with disabled participants. These show that while quantitative data are comparable, the amount and richness of qualitative data are ...

**Keywords:** disabled users, remote evaluation, usability research, usability testing and evaluation

**20 Reading alone together: creating sociable digital library books**

 Nancy Kaplan, Yoram Chisik

June 2005 **Proceeding of the 2005 conference on Interaction design and children IDC '05**

**Publisher:** ACM Press

Full text available:  pdf(462.51 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#)

Children between 10 and 14 years old continue to need support to develop advanced literacy skills. There is evidence that they may be reading less now. Libraries have long sought to cater to young adults but as more activities vie for the attention of children, the role of traditional libraries in the literacy lives of teens and 'tweens may be diminishing. As Digital Libraries (DLs) begin to offer resources to children in this age cohort, it is important that they support more than convenient

**Keywords:** children, digital annotations, digital libraries, participatory design, sociable literacy

Electronic document and electronic annotation evolve and complement the traditional document and annotation in recording, developing and making available community knowledge. This paper discusses electronic annotation and its importance as a tool for two way exchange of ideas among humans pursuing a common goal. The discussion is performed by presenting an example in the Earth science field.

**Keywords:** characteristic structure, electronic annotation, electronic document, virtual entity

**30 Technology in the home: Exploring technology adoption and use through the lens of residential mobility**

 Irina A. Shklovski, Scott D. Mainwaring

April 2005 **Proceedings of the SIGCHI conference on Human factors in computing systems: CHI '05**

**Publisher:** ACM Press

Full text available:  pdf(310.44 KB)

Additional Information: [full citation](#), [abstract](#), [references](#), [citations](#), [index terms](#)

One of the outcomes of massive adoption of technology is that much of daily technology use and consumption is embedded into "unremarkable" daily life routines. Occasionally, these routines undergo major shifts, often in conjunction with major life events such as marriage, birth of a child or a residential move. We propose a model of settling into a new location as a function of balance between the pull of the things left behind and the demands of the new and unknown. It is through this experience ...
